
SLA Photopolymer Resin: DSM SOMOS® EvoLVE 128

Properties

Ultimate tensile strength	56.8 MPa
Elongation at break	11%
Impact resistance	38.9 J/m
Water absorption	0.4%

A durable SLA material that produces highly detailed parts with an exceptionally smooth finish. Perfect for building end-use parts like jigs and fixtures, models, or prototypes for functional testing applications. Can be painted easily.

“Great for large, intricately detailed parts, as well as snap-fit designs.”

Example applications

Automotive prototypes

Architectural models

Medical models

PARAGON
Rapid Technologies
